

INNERCHISPA LLC · 2026

InnerChispa

Sovereign AI operations for
real businesses.

RalphilA

Local intelligence. Cloud capability.
Real-world execution.

THE PROBLEM

The problem

Founder-led companies run on scattered context, manual follow-up and knowledge trapped inside one person.

RalphilA

One principal agent, governed by evidence and human approval.

THE SOLUTION

The solution

RalphilA is the principal operations agent connecting memory, voice, governed tools, local intelligence and cloud reasoning.

RalphilA

One principal agent, governed by evidence and human approval.

WHAT EXISTS TODAY

What exists today

A working hybrid foundation: local compute, GPU inference, operational memory, voice, messaging, dashboards and an evolving MCP tool layer.

Evidence before expansion

Each milestone must leave a measurable operating or commercial result.

PC DOCTOR

PC Doctor

The active internal deployment and first measurable transformation environment.

RalphilA

One principal agent, governed by evidence and human approval.

QUALIFIED PIPELINE

Qualified pipeline

FEMAR, Joshua Degel Studio and accounting operations are proposal or discovery-stage opportunities, not closed revenue.

Evidence before expansion

Each milestone must leave a measurable operating or commercial result.

ONE CORE, MULTIPLE WORKFLOWS

One core, multiple workflows

The same agent architecture can support field service, workforce operations, creative studios and accounting integrations.

RalphilA

One principal agent, governed by evidence and human approval.

WHY DIFFERENT

Why different

Data sovereignty, hybrid deployment, operational memory, tool execution, voice access and human approval.

Evidence before expansion

Each milestone must leave a measurable operating or commercial result.

BUSINESS MODEL

Business model

Discovery and workflow design, implementation fee, monthly platform/support and expansion through additional workflows.

Evidence before expansion

Each milestone must leave a measurable operating or commercial result.

GO TO MARKET

Go to market

Start with operationally complex SMBs, prove value in one workflow and expand through repeatable vertical packages.

RalphilA

One principal agent, governed by evidence and human approval.

EVIDENCE DISCIPLINE

Evidence discipline

Measure time, quality, founder capacity and commercial conversion before turning modeled value into public claims.

RalphilA

One principal agent, governed by evidence and human approval.

ROADMAP

Roadmap

Productize deployment, close paid design partners, validate pricing, publish the PC Doctor case and begin U.S. market validation.

Evidence before expansion

Each milestone must leave a measurable operating or commercial result.

THE RAISE

US\$250K

Pre-seed capital tied to measurable milestones, not open-ended experimentation.

15-18 month operating plan

Productize, partner, measure and repeat.

USE OF FUNDS

Use of funds

Product and infrastructure, implementation capacity, founder delegation, sales, market validation and compliance.

Evidence before expansion

Each milestone must leave a measurable operating or commercial result.

LONG-TERM MISSION

Long-term mission

Make capable, private and voice-accessible AI useful to businesses, older adults and communities with limited access to technology.

RalphilA

One principal agent, governed by evidence and human approval.
